EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Tyler Stevenson on September 21, 2007.

2. The application has been amended as follows:

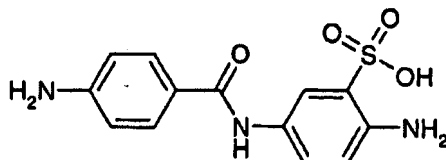

- a. Claims 2-10, 12, 13 and 20 have been cancelled without prejudice to their further prosecution in a continuation application.
- b. Replace claim 1 with:
-- 1. A compound of the formula

(Basis for the amendment is found in applicant's specification, page 25.)

c. Replace claim 11 with:

-- II. A process for the preparation of a compound according to claim 1,
comprising tetrazotisation of

and sequential coupling with barbituric acid followed by coupling with
3-acetoacetylamino-4-methoxy toluene 6-sulphonic acid. --

(Basis for the amendment is found in original claim 11 and applicant's
specification page 26.)

d. In claim 15, line 2, delete "of the formula (1),"

e. In claim 16, line 1, delete "of the formula (1),"

f. In claim 17, line 1, delete "of the formula (1),"

g. In claim 19, line 1, delete "of the formula (1),"

h. Replace the abstract with:

-- The present invention relates to novel yellow anionic dyes, a process for
their preparation, certain novel intermediates for their preparation and the
use of these dyes for dyeing natural or synthetic materials, in particular,
paper. --

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: The closest prior art of record, Moser (US 5,545,724, columns 11 and 12, first formula), Moser et al. (US 4,213,897, columns 21-24, claim 1), and GB 902228 (page 1, lines 10-30), all teach dyes derived from barbituric acid, however, none of the structures match that of the compound of claim 1. Hanhart (US 3,078,266, columns 15 and 16, claim 2) teaches dyes with acetoacetic anilide groups, however, none of the structures comprise a barbituric substituent or match that of claim 1. Given that the compound of claim 1 is novel, any compositions, methods of preparation and methods of using the compound are also novel and therefore allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amina Khan whose telephone number is (571) 272-5573. The examiner can normally be reached on Monday through Friday, 8:30-5.
